

FULL PAYMENT LIFECYCLE MANAGEMENT

From finding the best solutions to full independence
in running and developing your own payment platform.

- | | | |
|-----------|---|---|
| 01 | Discovery
<i>Find the right payment methods</i> | Find PSPs for your markets, currencies and business. Review requirements and get provider introductions. Our catalogue includes more than 5,000 payment methods worldwide, with commercial terms, conversion metrics and payment journey examples. |
| 02 | Direct Connect
<i>Connect methods through one API</i> | More than 5,000 integrated payment methods. Connect selected methods in 1-2 business days through a single API. PayStar maintains the adapters and preserves the original provider context. |
| 03 | Core
<i>Manage payment operations</i> | Routing, monitoring, transaction investigation and reconciliation. Improve conversion through transparent control and flexible payment routing. Standard and Enterprise offer a choice of service and support levels. |
| 04 | Core Dedicated
<i>Your product, with a PayStar team</i> | A separate product branch, a dedicated team and infrastructure aligned with your priorities and needs. Develop your own version with PayStar's payments and engineering expertise. |
| 05 | Core Fork
<i>Your infrastructure, built on working code</i> | Build your own payment platform on PayStar's existing, working code . Manage infrastructure and development with your own team, reducing the risks of lengthy development and design mistakes. |
